Hi team,

Here is my contribution summary for milestone 5:

As team lead:

- Organized team communications via discord
- Organized milestone pdfs
- Planned out team operations
- Managed Milestone submissions

Project Contributions:

- Backend engineer
- Set up and configured AWS EC2 machine and RDS MySQL remote database
- Managed all commits to the AWS live server
- Created .pem-key file for SSH logins and managed the .env for database connections and Gemini API
- Designed back-end based on project specifications and front-end team feedback
- Managed all database migrations to the RDS Database
- Helped build and improve search function logic
- Built AI feature for goal creation end-to-end
- Built user messaging function

Number of GitHub submissions to the team branch: **37**

Thank you all,

Omeid Nadery

Team Lead
